

POWERING THE FUTURE OF LIFTING!

We are a leading manufacturer and service provider of quality-certified overhead cranes.

Formerly known as GEW Cranes, our new identity embodies growth, innovation, and a modern approach to engineering excellence. With decades of experience in designing and manufacturing EOT cranes, hoists, and custom material handling systems, we've built a reputation for reliability and precision. Every LiftoMech crane is a reflection of our commitment to quality, safety, and performance — Engineered to endure, built to empower.

ABOUT US

We, LiftoMech Crane, Formerly known as GEW Cranes, are ISO 9001:2015 certified and recognized among the foremost manufacturers of an extensive range of cranes, including Material Handling Cranes and EOT Cranes. Our products are engineered with high- quality components and advanced manufacturing techniques, ensuring long service life, ease of operation, minimal maintenance, durability, and robust performance. In addition, we provide comprehensive installation solutions and Annual Maintenance Contracts (AMC) to deliver reliable support and lasting value to our clients.

Our Product Portfolio:

Double Girder EOT Crane

Built for heavy-duty applications, Double Girder EOT Cranes offer higher lifting capacities, longer spans, and greater stability. Ideal for large-scale industrial operations, these cranes ensure smooth material handling with robust performance.

Single Girder EOT Crane

A cost-effective and versatile solution, Single Girder EOT Cranes are perfect for medium-duty applications. Compact in design yet powerful, they provide efficient load handling with minimal maintenance.

Goliath Crane

Engineered for outdoor operations and shipyards, Goliath Cranes run on ground-level rails and are designed to handle heavy loads with ease.

Semi-Goliath Crane

A hybrid lifting solution, these are ideal for situations where one side of the crane runs on an elevated runway while the other runs on ground-level rails.

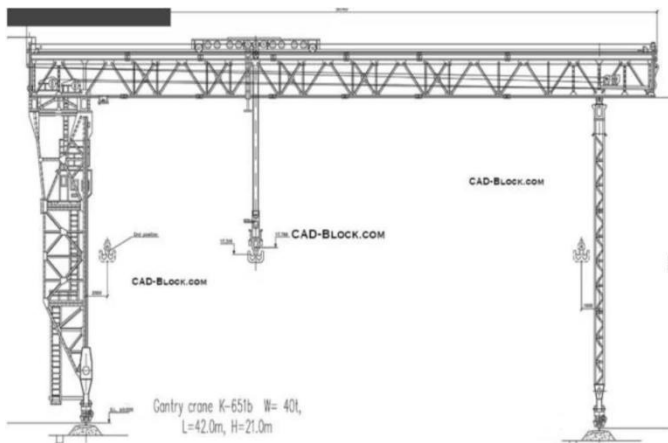

Jib Crane

Compact & highly flexible, Jib cranes are designed for localized material handling. Suitable for assembly lines, machining areas & small workstations.

Hoists

Our Electric wire rope and chain hoists are reliable lifting solutions that compliment our crane. Built for efficiency and safety, they provide smooth vertical lifting for various load capabilities & Applications.

Crane Design & Consulting

We provide expert design and consulting services tailored to your operational requirements.

Crane Relocation & Upgradation

Our relocating and upgradation services help extend the life and performance of your cranes. Whether moving equipment to a new site or upgrading capacity.

Trusted by Industry Leaders..

and other leading manufacturing companies who rely on our precision engineering solution..

15+

Years of Expertise

2000+

Cranes Installed across India & Globally

Manufacturing facility in Alandi, Pune , MH

Total Area : 25000+ Sq. Ft.
